

## Member Technical Staff (MTS-1)

### Job Description

At BYJU'S we are looking to bring passionate engineering into the role of Member Technical Staff (MTS-1) who are keen on building their careers in developing solutions that will transform the way people learn from early years to professional skills. You will get to work on complex distributed systems which are solving real-world problems and scale for hundreds of millions of users. You need to take the challenges and ownership that comes while developing a complex system. You will be working in a fast-paced and agile work environment delivering quality and innovative solutions in highly collaborative environments that have immediate business impact. As an MTS, you will also get to work with Senior Engineers/Architects at BYJU'S to evolve the design and architecture of the system. The skillsets we aim to hone for our MTS Engineers will enable them to develop Android, iOS, Backend, Testing Frontend solutions for BYJU'S Products

#### **Preferred Skills:**

- Good understanding of software engineering practices, Data Structures & Algorithms
- Familiarity with the syntax of languages such as Java, C/C++ or Python.
- Knowledge of Computer Science fundamentals such as object-oriented design, algorithm design, data structures, problem solving, and complexity analysis
- Design and code the right solutions starting with broadly defined problems.
- Work in an agile environment to deliver high-quality software

#### **Desired candidate profile:**

- A collaborator and a team player
- Strong sense of ownership and accountability
- Organizes and expresses ideas clearly and concisely.
- Exhibits strong problem-solving skills.
- Passionate about learning and education
